The Only Lawn Care And Maintenance Resource You Will Ever Need.: Hundreds Of Useful Tips To Obtain The Lawn Of Your Dreams

Synopsis

Whether you love gardening or not, we all love lawns! And we all want a lawn that looks good all year round and one that we can be proud of. The contrast of lush green with the colourful flowering beds in the summer whilst in the winter, the green lawn bringing some colour to an otherwise dull colourless garden. The key elements in all gardens are the surfaces and it is these different types of surfaces that really define the garden. We are led to believe that the average size of our gardens is approximately 1800-2000 square feet and that will include surfaces such as gravel paths, paved courtyards and patio areas. Whatever the size of garden you have, it is highly likely and more to the point, that you will not see a garden consisting solely of plants, trees, shrubs etc., with dirt exposed in between this planting. Generally, you will see gardens with some form of permanent ground cover which can be borders, beds, rockery, summer houses and even water-features. It is clear, therefore, that there is likely to be more than one sort of ground cover used in most gardens and the one that is used mostly is the lawn. Quite simply, a lawn is an area covered with turf grasses which then requires mowing to help maintain it and this grassed area is also capable of standing a fair amount of foot traffic and usage. A well cared-for lawn can have such a magical effect on a garden. The open area of green grass, the living carpet, is soothing to walk on, to look at or even to enjoy by watching the children play on it! Whether you love gardening or not, we all love lawns! And we all want a lawn that looks good all year round and one that we can be proud of. The contrast of lush green with the colourful flowering beds in the summer whilst in the winter, the green lawn bringing some colour to an otherwise dull colourless garden.
