Customer Reviews

Methods described are fairly superficial, but accurate. Recommended schedule for maintenance too frequent unless tools are used professionally on a daily basis. Recommends cleaning virtually all tools with lacquer thinner, which is effective, but never mentions the safety hazards associated with this product, It is highly flammable, irritating to skin and eyes, is absorbed by skin, contains potentially cancer producing substances, and may cause injury to lungs, liver, kidneys and nerves. Lacquer thinner should be used only with proper protective equipment and ventilation.
