Fire Prevention: Inspection And Code Enforcement

Synopsis

The third edition of Fire Prevention: Inspection and Code Enforcement is updated to reflect the 2006 ICC and Uniform Fire Codes. This book features step-by-step explanations and practical examples of the use of model building and fire prevention codes, including detailed information on the legal, economic, and political aspects of the fire inspection process. A comprehensive guide to the "nuts and bolts" of actually inspecting and enforcing code, topics addressed include: right of entry, enforcement authority, the permit system, building limits and types of construction, and fire protection systems and their maintenance. Its convenient, 3-part format enables readers to progress logically from the study of code administration, inspection, and enforcement procedures. Ideal for use as a key component of any professional fire-inspector training program, this book also serves as an excellent reference for building and property maintenance inspectors.

Customer Reviews

We are very pleased with the content, flow, and layout of the book. We are using to supplement our fire prevention training and are impressed with the book.

David Diamantes has written a great treatise on the fundamentals of how to approach and conduct fire inspections. It is eminently practical and well seasoned, with no fluff; and, gives the new and seasoned fire inspector the code-based knowledge necessary to understand why it is important to look at certain items in the field. My only concern (and the reason for my three star rating) with this

text is the code references are circa 2006....which means it is quickly getting long in the tooth in "code years".I will buy the next edition should Mr. Diamantes write a new edition (please!).

This book came on time and said what the description posted said would be included. Overall great and i would definetly buy from this owner again

The book was highlighted in and the questions at the end of the chapters were all filled in . It makes it hard to learn anything with a book marked like this
